

# Aerodynamic Fin Installation Instructions

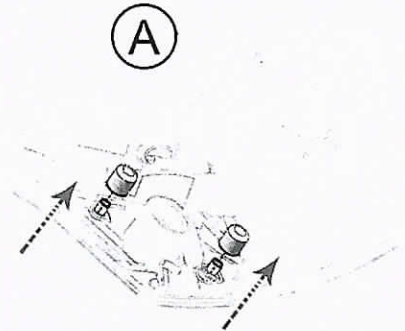

## WARNING

- Once the aerodynamic fin is installed, it is difficult to remove, if removed forcefully it may break.
- Be sure which fin set you would like to install, the 3M sticky backing is pressure sensitive adhesive and bonds on contact.

## Aero fin removal instructions

### (A) - Air blade fin caps removal

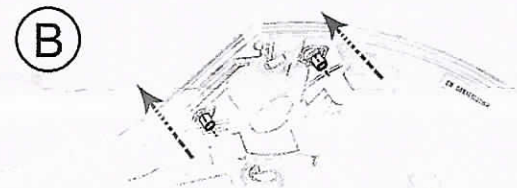

1. Remove the black plastic Nitto Denko caps with the internal rubber sleeve.

### (B) - Air blade fin removal

2. Holding the lamp, firmly apply even pressure on both shafts.

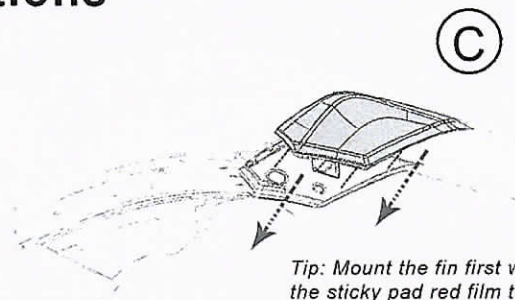

*Note: You can apply pressure using a thumb on either shaft with the lamp laying flat and the serial no. showing on the top side.*

## Aero fin installation instructions

### (C) - Air blade fin

1. Remove the red film liner from sticky pad backing.
2. Mount the fin on the lamp, pressing firmly on the top and bottom until contact with surface.

*Tip: Mount the fin first without removing the sticky pad red film to test fitment.*

### (D) - Rubber sealing caps

3. Apply direct force, pressing the caps down on either shaft

*Note: you can use a drop of dish detergent on the shaft for ease of installation.*
