

Manual of AD073 Installation

Step 1: Remove the genuine rear lamp.

Photo 1

1. Remove the trim panels of the rear lamps and remove the genuine lamps.
2. Remove the screws which was fitting for genuine car, and in the end please use our screw from material pack 1 for fitting.

Step2-1: Arrange the wirings

Photo 2

3. Pull the trim panel up and hide the wiring A and wiring B from material pack 2.

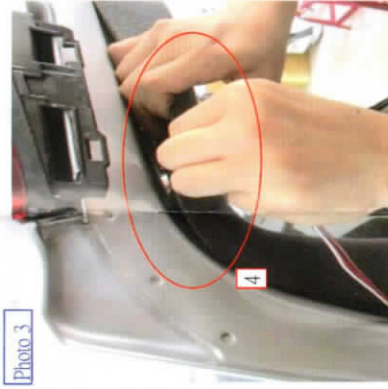

Photo 3

4. After arranging the wiring, put the trim panel back onto the car.

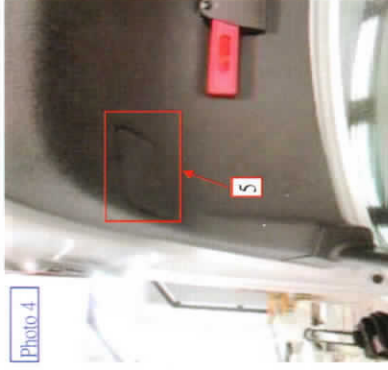

Photo 4

5. Remove the trim panel of the inner lamp.

Step 2-2: Pull out the wiring

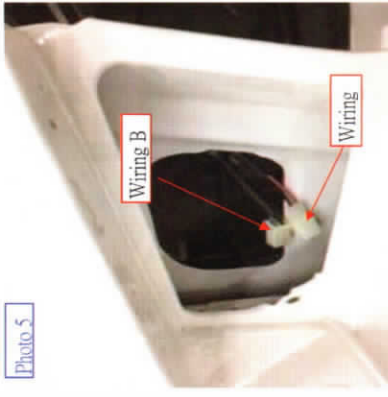

Photo 5

6. The plug of wiring A and wiring B should come out from the hole of inner lamp as the photo shows.

Step 2-3: Connect the plugs with inner lamp

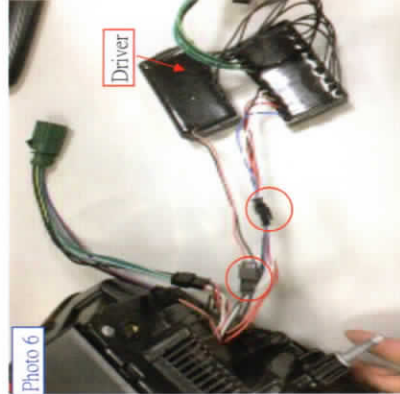

Photo 6

7. Plug the drivers from material pack 2 onto the inner lamp.

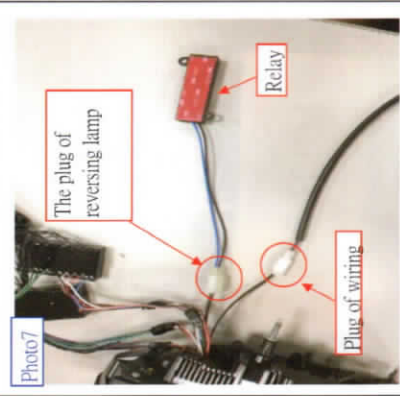

Photo 7

8. Connect the relay from material pack 2 with the reversing plug of the inner lamp (as photo shows). And stick the relay onto the back of the lamp.
9. Connect wiring A with the plug of the lamp as photo shows.

Step2-4: Arrange the wirings.

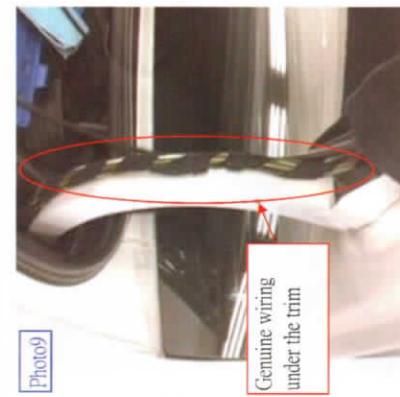

Photo 9

10. Remove the trim panels of the trunk bracket and there is the wiring under the panel.
11. Tight wiring A and wiring B with the genuine wirings which are under the panel of trunk bracket.

Step2-5: Arrange the wirings.

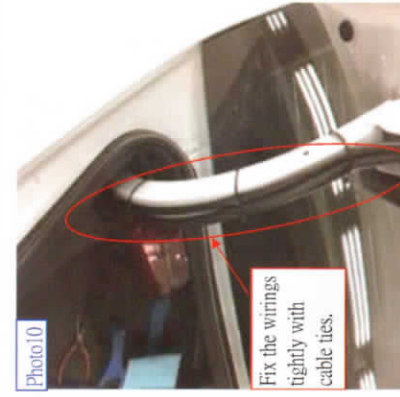

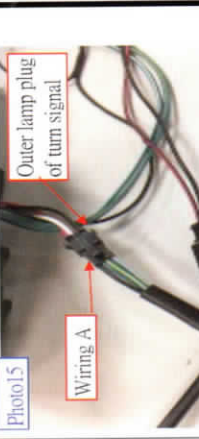

Photo 10

12. Use the cable ties to fix the wirings onto the trunk bracket.
13. And put the trim panel of the trunk bracket back.
